SUMMARY

- Full-stack developer with hands-on experience in building responsive, scalable, and user-friendly web applications.
- Skilled in frontend technologies (React.js, React-Routers, JavaScript, Bootstrap, TailwindCSS and ShadCN
- Skilled with API endpoints, API integration, and modern web workflows using MongoDB and Express JS.
- Continuously upskilling with modern tools such as TypeScript, Python, Node.js, React-Redux Toolkit, WebSockets, SQL and OpenRouter to deliver full-stack solutions.

SKILLS

Frontend : HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap, Tailwind CSS, React-Router, ShadCN

Backend & Tools : Node.js, REST API Integration, NPM, Mongoose, Express.js

Platforms & Frameworks : React JS, Express JS, MongoDB, API Fetching/Integration, Redux Toolkit, Api.ai

Additional Tools : Git/GitHub, Cross-browser Testing, TypeScript (fundamentals), Python

EXPERIENCE

Software Engineer/Software Developer

Vision Techno Service Pvt Ltd

Software Developer at Vision Techno Services, Pvt Ltd

Nov '23 — Apr '26
Hyderabad, Telangana, India

PROJECTS

AI Doctor Consultation App [Link](#)

Feb '26 — Apr '26

- Built and deployed a full-stack AI-powered healthcare assistant using Next.js (client) and Node/Express (server); integrated OpenAI for natural-language diagnosis, MongoDB for persistent user data, and JWT-based authentication to secure user sessions.
- Implemented real-time form handling, role-based UI (patient/doctor), async API endpoints for symptom analysis and followup suggestions, client-side validation, and responsive design for cross-device use.
- Deployed the frontend to Vercel and the backend to Render, configured environment secrets, and established CI-friendly project structure and modular API routes for maintainability.
- Integrated a third-party LLM (OpenAI) into the server pipeline to generate context-aware medical suggestions and follow-ups.

KaviosPix Image Management App [Link](#)

Dec '25 — Feb '26

- Developed a production-ready image-sharing platform using React, Express and MongoDB. Implemented Google OAuth, JWT-based protected routes, RESTful APIs, and client-side performance optimizations; deployed on Vercel.
- Engineered RESTful API endpoints with Express and MongoDB for image upload, retrieval, edit, delete, and user management, with server-side validation and error handling.
- Hardened app security: token-based auth, input validation, CORS policy, and secure storage of environment secrets.
- Improved frontend architecture with component-driven design, React Hooks, Context API (or Redux if used), and performance optimizations (lazy loading, debounced search).

Task Management and Team Collaboration App [Link](#)

Sep '25 — Nov '25

- Built a Trello-style project management web app (Workasana) implementing kanban boards, tasks, and user collaboration.
- Designed and developed responsive React front end with component-driven UI, client-side routing, and state management.
- Implemented RESTful Node.js/Express backend with JWT authentication, role-based access, and secure password handling and also integrated real-time updates and optimistic UI patterns for smooth board/task interactions (drag-and-drop, inline edits).
- Gained practical DevOps skills: environment configuration, deployment to Vercel, API hosting, and managing secrets in production.

EDUCATION

Bachelors in Nautical Science, Annamalai University (GPA: 8.5)

Aug '19 — Oct '22
Chennai
